△ With an understated simplicity and contemporary design, Tord Boontje's O-Nest collection for Moroso makes the statement that functional design can resemble that of a piece of art. The embossed floral decoration is a hallmark of the Dutch designer, re-imagined to embody the simplicity of nature. www.moroso.it

◁ The new X Series, from Summit, is an understated way to add a more masculine look into your landscape. Its extra wide armrests and deep seat extend an open invitation. For more information visit www.summitfurniture.com

Summit's occasional table ▷ with a tray is the perfect balance between form and function. This piece is part of the Charter Collection and can be found at www.summitfurniture.com

◁ Giati's new textile collection, Summerland, plays on organic forms and shapes in natural colorways. The collection maintains the balance between the integrity and elegance of a high end outdoor fabric collection while not portraying the collection's motif too literally. www.giati.com
